

Seminar on “The World of Constants in Physics”

Date: 20-01-2017

Participants: 75

Prof. V. H. Thakkar, Department of Physics, Sir P. T. Sarvajani College of Science, Surat

Brief Report:

Brief Report: During the course of study, we come across numerous constants, most of them we use frequently while solving problems. Most of them are universal constants, however some of them are not. Prof. V. H. Thakkar in this talk discussed these constants in depth by giving their origin, their historical aspects, their presently accepted values and measurements etc.
