Prof. V. H. Thakkar, Department of Physics, Sir P. T. Sarvajani College of Science, Surat

## Brief Report:

The first woman to do doctorate in France, to do doctorate in science in the whole of the continent of Europe, to win a Nobel Prize, to win two Nobel Prizes in two different fields of science (Physics and Chemistry), to be a Professor in Sorbonne University and to be a mother Nobel laureate of a daughter Nobel laureate was no one else but Madam Curie. The department of Physics decided to organize a Lecture Series on Founders of Science and the first lecture of the series was on Madam Curie, presented by Prof. V. H. Thakkar. The idea of the lecture series was to present the life-sketch of the personalities who have contributed immensely in the development of science which in turn has changed the life of the mankind. The biography of Madam Curie is highly inspiring for one and all. It narrates how one can come up in spite of all kinds of hardships and struggles of life. Prof. V. H. Thakkar highlighted some such incidents which triggered awe and respect amongst the audience for her.
