

Seminar on “Is Anyone Out There?”

Date: 22-07-2017

Participants: 246

Dr. Pruthul R Desai, Department of Physics, Sir P. T. Sarvajani College of Science, Surat

Brief Report:

Most of us are fascinated by the thought of an alien. Many attempts have been made so far to have a trace of an aliens if at all they are existing. Dr. Pruthul Desai in this talk tried to address the issues such as the possibility of finding them in the universe, the places where they could be found, the circumstances which are feasible for their existence etc. The audience received the talk overwhelmingly and there were many questions at the end of the talk which were equally well responded by the presenter.
