A Day-long Program on “Lecture cum Demonstration of Physics experiments”

Date: 28-01-2018

Participants:345

Prof. H. C. Verma, Retd. Prof., IIT, Kanpur

Brief Report:

Prof H C Verma, Retd Professor, IIT, Kanpur is a very well-known figure in the Physics community and also among the students. He was invited by IAPT RC – 7 for a week in the latter half of January, 2018. He spared a whole day for our college on having two sessions during it. The first session was at 9:30 am in which he addressed to the UG and PG students of the colleges of South Gujarat. He gave power point presentation on “Science in India”. In his presentation, he started from the ancient times to the present time and talked about the contributions of Indians in the scientific world. He motivated the young students in the audience to have their career in the field of research. He also narrated the instances of his life and the whole presentation went on in a very light atmosphere. In the post lunch session, the audience was comprising of the school students. In this session he gave demonstrations of experiments with the help of his coworker, Mr Amit Vajpayee. It was a wonderful experience for one and all present there. After the sessions, the students had asked a lot of questions which he answered untired. He is full of energy and always ready to respond to the students. He is a giant figure in the true sense.
