

Seminar on “It's a wiggly, wiggly universe”

Date: 06-01-2020

Participants: 53

Dr. Pruthul R Desai, Department of Physics, Sir P. T. Sarvajani College of Science, Surat

Brief Report:

The Nobel prize in Physics for 2019 was given for the theoretical discoveries in physical cosmology and for the discovery of an exoplanet orbiting a solar-type star. Dr. Pruthul Desai talked about it very vividly and ardently. In an awarded manner in his characteristic manner, he explained the methods by which exoplanets can be discovered in depth. He tried to explain the issues in the simplest possible way, touching all the aspects of the subject. Basically, he prepared a background before an expert from other institute comes and delivers a lecture on the subject. At the end of the talk, there was a question-answer session as well.
