## Brief Report:

Brief Report: As the covid pandemic started spreading its wings across the globe and most of us were jostled in to, work from home situation. To utilize this period for some constructive work, it was decided to have webinar series. And the very first talk was “What is Physics?” Which was delivered by Prof. V. H. Thakkar. He talked about the introduction of physics, its historical aspects and developments. He also described the scope of the study of physics in time scale, mass scale and in the scale of the length. The importance of the mathematical skills in the study of physics was also explained distinctly by him. The linkage between the fundamental ideas of physics and the development of technology was also mentioned during the presentation. In all, this webinar was a first step towards continual learning and over all it was a successful attempt.
