The Spiny Skinned Wonders of Ocean

By

Dr. Jaya M. Patel

Asso. Prof. & Head, Department of Zoology,
Department of Zoology,
Sir P.T. Sarvajanik College of Science,
Surat-395001

Date: April 30th, 2020

Time: 11.00 AM

Brief report:

The oceans are full of mysterious and mesmerizing creatures. One such group of animals constitute a phylum called Echinodermata. The animals comprising in this phylum have a typical characteristic of having spiny skin. As a part of webinar series “LET'S EXPLORE THE BIOSPHERE DURING LOCKDOWN”, which was jointly organized by Dept. of Botany and Dept. of Zoology, Sir P. T. Sarvajanik College of Science, Surat, on 30th April, 2020 Dr. Jaya Patel delivered a lecture on “The Spiny Skin Wonders of Ocean”. It was a very informative session and students got an opportunity to dwell into the mesmerizing marine world of the echinoderms.
