Brief report:

Wetlands are rich in biodiversity and are a habitat for a dense variety of plant and animal species. As a part of webinar series “LET'S EXPLORE THE BIOSPHERE DURING LOCKDOWN”, which was jointly organized by Dept. of Botany and Dept. of Zoology, Sir P. T. Sarvajanik College of Science, Surat, on 5th June, 2020 Dr. Namrata Umrigar delivered a lecture on “Jewels of Wetlands”. It was a very informative session and students got to know about the wetland biodiversity, its status, why it matters and to promote actions to reverse its loss.
